

# **Let's make digital sustainable**

**Welcome to EcoCompute 2024**

**EcoCompute2024**

# **We made it!**

**The first pure tech conference on sustainability  
in Software, Hardware and Datacenters is happening**

**Thanks to you all ❤️**

**EcoCompute2024**

# What you can expect

## Content

- **120+ participants**
- **20+ speakers**
- **20+ talks**
- **Interactive workshops**
- We want to advance software sustainability beyond pure concepts and carbon accounting.
- We want to take action and make a difference
- We bring together people who work with hardware, people who design the software and the people that provide the infrastructure.

**EcoCompute2024**

# What you can expect

## Broadening the scope - Advancing the topic of Green Coding

- **IEEE** will introduce it's new initiative from the **IEEE Technology Center for Climate** with a software focus
- **dena (Deutsche Energie Agentur)** has tendered a study for:  
"Green Coding als Standard in der Softwareentwicklung für eine stromsparende Gestaltung der Digitalisierung"
- We (**Green Coding Solutions**) will procure this study in conjunction with our **partners** (see below)
- We are still looking for experts and **Michelle** might approach you to be part of it. Approach her if you are interested!
